# 2.3.3

#### **Overrides**

If Region reviews indicate that an exchange carrier's input is not reasonable in relation to its forecast or historical data and expected results, NECA can override data already locked in. Override transactions may be necessary to:

- release data not previously released by and exchange carrier
- correct erroneous data
- remove data that has not been explained satisfactorily
- make "new" data entries.

An override is usually accomplished only with written permission from the exchange carrier. However, the Vice President-Industry Relations has the authority to override data if pool integrity is at risk.

# 2.4

# **Processing**

Once lock activities are completed, on the third to last workday of the month, the settlement is processed. NECA uses the entries on the data input form (AS1080-I) to calculate pool results and individual company settlements. The following amounts are calculated:

- residue ratio
- rate of return factor
- net balance
- prior period net adjustments
- settlement rate adjustment
- total net balance.

#### 2.4.1

#### Residue Ratio

The residue ratio is the rate of return on investment to pool members. To arrive at the residue ratio for each pool, Average Schedule and Incentive Option settlements, total expenses and taxes are deducted from total revenues. The amount remaining is divided by the total pools investment to calculate the residue ratio. The monthly settlement combines the exchange carrier's expense and tax reimbursement and the residue ratio (return) on its share of the pool's investment.

# 2.4.2

# Rate of Return Factor

The settlement rate is developed using the most recent average schedule formula filed by NECA and approved by the FCC. The rate of return factor is used to adjust the exchange carrier's settlement rate to reflect the earnings at the pool rate of return.

	Pool Administration Procedures
Small Company Incentive	e Plan: Average Schedule Option

Section 2	
The Settlement Cycle	

# Rate of Return Factor (cont'd)

Example:

If Pool Rate of Return is:	Then CL Factor is	Them TS Factor is:	
10.50%	.983594	.985235	
11.25%	1.000000	1.000000	
12.50%	1.027343	1.024609	

# 2.4.3

#### Net Balance

A net balance is the difference between the settlement due an exchange carrier and the revenue the exchange carrier has reported and is holding. However, before determining the actual cash flow to or from the company for that month, it is necessary to incorporate the effects of data month adjustments and retroactive adjustments.

# 2.4.4

# Prior Period Net Adjustment (PPNA)

Since exchange carriers can revise their revenue and demand data for the preceding 24 months, DMAs and RAs for prior months affect an exchange carrier's monthly cash flow. Not only is a current month's settlement processed; adjustments are made to prior month's settlements as more accurate data becomes available. The system recalculates total pool amounts, residue ratios and changes in net balances. The prior period net adjustment adds these changes and applies them to the current month's total net balance. PPNAs enable the system to redistribute prior month's settlement dollars as part of the current month cash flow.

# 2.4.5

# Settlement Rate Adjustment

The settlement rate is calculated using the most recent average schedule formulas filed by NECA and approved by the FCC.

At the end of the first year of the two-year incentive settlement period NECA will true-up the settlement rate using updated demand levels for the base period, and will calculate a settlement rate adjustment. This adjustment is calculated by taking the difference between the original settlement rate and the trued-up rate, multiplied by the demand for the year. The resulting Settlement Rate Adjustment will then be distributed prospectively, in 12 monthly installments, as part of the current month cash flow. The net of all incentive company settlement rate adjustments will be incorporated into the revenue requirement of NECA's rate calculation for the next tariff period.

# 2.4.6

#### **Total Net Balance**

The total net balance combines the current month's net balance with PPNAs, settlement rate adjustment and Universal Service and Lifeline Assistance amounts. This determines the exchange carrier cash flow for the month. A "positive" total net balance reflects money NECA will pay to the exchange carrier. A "negative" total net balance reflects money the exchange carrier will pay to NECA.

# 2.5

# **Settlement Rate**

The settlement rate is calculated by converting the most recent average schedule formulas approved by the FCC to minute sensitive rates for Common Line, Traffic Sensitive (TS) Switched and a retention ratio TS Special. The Average Schedule formulas are adjusted for Common Line growth. Growth is calculated using the Carrier Common Line Minutes of use during the most recent 12-month period over the Carrier Common Line minutes of use in the preceding 12-month period.

At the end of the first year of the two-year incentive period, NECA will true-up the settlement rate based on trued-up demand levels, and calculate a cash flow adjustment.

# 2.5.1

#### **New Settlement Rate**

The new settlement rate will be calculated for the next period the most recent average schedule formulas filed by NECA and approved by the FCC.

# 2.6

# **System Reporting**

# 2.6.1

#### Settlement Statements from NECA

By 10:00 a.m. Eastern time of the third workday following the current data month, exchange carriers can retrieve the following reports directly from their data terminals:

- AS1080-0 Data Month Estimate Original View
- AS2083-0 Prior Period Net Adjustment Detail
- AS3080-0 Settlement Summary Original View.

In addition, NECA mails a copy of these reports to all exchange carriers.

# 2.6.1.1

# **Settlement Summary**

The AS3080-0 is the exchange carrier settlement statement. It displays the computation of the current months settlement using DME data and the combined effects of adjustments. In addition, it shows Long Term Support amounts as well as distributions from USF and Lifeline Assistance funds.

# 2.6.2

# Post Settlement Analysis

NECA Regional Offices also conduct post-settlement analysis to track pool movement and to identify exchange carriers that have not trued-up their data.

# 2.6.3

# Cash Flow from the Exchange Carrier

Exchange carriers that owe amounts to the pool will be billed via an invoice mailed by NECA on the 6th workday of the month. To remit payments in amounts of \$50,000 or more, exchange carriers must:

- use electronic funds transfer as a Wire Transfer, Automatic Clearing House (ACH) payment or Corporate Trade Payment (CTP)
- notify NECAs Assistant Treasurer Cash Management/Banking Relations at (201) 884-8199 before making payments
- send electronic funds transfers to NECA's account #199-9830, bank routing number 043000261 at Mellon Bank, Pittsburgh, PA
- include company name, company code, invoice number and amount in the reference field of the wire, ACH or CTP.

To make payments less than \$50,000 exchange carriers can:

- mail a check to arrive at NECA's designated lock box no later than the 4th from last workday of the month that follows the data month
- write the company code on the face of the check
- enclose the duplicate (yellow) copy of the invoice

# Cash Flow from the Exchange Carrier (cont'd)

• use the return envelope provided by NECA.

NECA's lock box address is: NECA

P.O. Box 371245

Pittsburgh, PA 15251-7245

Companies making payments of less than \$50,000 can also use electronic funds transfers.

# 2.6.4

# Cash Flow to the Exchange Carrier

Settlement cash flow occurs in the month that follows the data month. Exchange carriers that have payment due them receive their cash flows via electronic funds transfer. If electronic funds transfer is not feasible, payment is made by check mailed two business days in advance of the due date (for due dates see Exhibit 2.2).

# 2.6.5

# **Late Payment Penalties**

To offset the borrowing costs incurred by late payments, NECA assesses late payment charges to exchange carriers for delinquent payment. The late payment factor will be the average interest rate (in decimal value) which NECA incurred for borrowing to cover the delinquent period. This is applied to the number of days from the payment due date up to and including the date NECA received payment.

- AS1080 Optional Worksheet for Adjustments
- Instructions for Optional Worksheet for Data Month or Retroactive Adjustments
- Instructions for Optional Worksheet to Compute Spread Adjustments

# **Reporting Procedures**

3.0

# **Reporting Data to NECA**

Incentive companies input pooling data to the NECA settlement system from the third workday of the month to the seventh from last workday of the month. ECs may mail their input to the NECA Regional Office prior to the ninth from last workday of the month. Section 6 lists the mailing addresses for each NECA Region.

Exchanges carriers complete an AS1080-I input form to report current data month estimates. In addition, exchange carriers may complete additional AS1080-I forms for each month in which they are reporting data month adjustments or retroactive adjustments.

3.0.1

#### **Reviews and Data Verification**

The pooling process and all information submitted by pool participants is subject to examination by NECA to the extent necessary to verify the accuracy and reasonableness of the revenues underlying the compensation amounts. All participants must maintain backup data sufficient to verify data accuracy.

3.1

# Types of Data Input to the AS1080-I

The following table summarizes data entry types, time frames and requirements. More detailed information on reporting data adjustments and reporting procedures follows.

Section 3	
Data Entry and Reporting	Procedures

Entry Type	Data Type	When Input	Requirements
Data Month Estimate (DME)	Estimated revenues and demand data, for the month	Current Month	EC must adjust demand data and revenue estimates to reflect booked values within 2 months. If EC is reporting actual revenues, submitter must fill in comments line of IC1090-I.
DME - Option	Default data used for settlements	Current Month	EC forecast or default data is input by NECA if exchange carrier does not enter a DME.
Data Month Adjustment (DMA)	Difference between a prior DME and the most recent estimated or actual data	Within 2 months of DME	DMAs are required to be submitted with 2 months of DME for demand and access revenue data. Items include:  Access Minutes Access Lines in Service Carrier Common Line Revenues End User Revenues Traffic Sensitive Switched Access Revenues Traffic Sensitive Special Access Revenues End User SLC Waiver Lifeline Connection Assistance. Submitter must indicate on the data comments line the reason for the adjustment; for example, "Revenue True-Up to Actuals"

Section 3	
Data Entry and Reporting F	rocedures

# **Entry Type**

# Retroactive Adjustment (RA)

# **Data Type**

**Difference** between previously reported data and revised actual data

# When Input

Within 4 to 24 months of DME

# Requirements

RAs are necessary whenever a change to data is indicated. Adjustments are needed to:

- change incorrectly reported data as errors are discovered.
- enter changes in revenue or demand data.
- comply with retroactive changes in settlements or separations procedures.

Submitter must indicate on the data comments line the reason for the adjustment; for example, "Revenue True-Up."

Section 3		
Data Entry and	Reporting	Procedures

Entry Type	Data Type	When Input	Requirements
Minor Adjustment Option	Entered as adjustments to make cumulative changes to data for a maximum of 24 prior months	Within 4 to 24 months of DME	May be incorporated into a single RA as long as the cumulative change does not exceed the thresholds mentioned under minor adjustment reporting.  Submitter must indicate on data comments line that a minor adjustment is being made.
Spread Adjustment Option (SPR)	Entered as adjustments to update 2 to 12 consecutive prior months	From system open until ninth last workday of current month	May be used to update 2 to 12 consecutive data months excluding the DME month.  Submitter may not input an individual DMA or RA for months included in the spread adjustment.
			Submitter must fill in the data comments section to indicate a spread adjustment is being used.
			Pool participation must be the same for all months adjusted.
			EC must settle as an incentive company for all months adjusted.

Section 3	Pool Administration Procedures
Data Entry and Reporting Procedures	Small Company Incentive Plan: Average Schedule Option

3.2

# **Reporting Procedures**

# 3.2.1

# **Advance Notification Requirement**

NECA monitors the pool to ensure that submitted data is as accurate as possible. Very large adjustments can significantly affect all pool members. When adjustments are submitted which exceed the following thresholds, exchange carriers must notify their NECA Regional Offices no later than the 10th workday of the month in which the adjustment will be reported. This will allow enough time to review the change with the EC to avoid the risk of inaccurate data affecting pool members.

FAILURE TO MEET THE ADVANCE NOTIFICATION REQUIREMENTS, CAN RESULT IN NECA NOT PROCESSING THE ADJUSTMENT IN THE MONTH SUBMITTED.

Pool Thresholds (+ or -) per Line Item/Month

AS1080 Line Items	Common Line	Traffic Sensitive
Revenues,	\$50,000	\$50,000

# 3.2.2

# **Minor Adjustment Reporting**

The minor adjustment option is intended to ease administrative efforts when adjustment amounts do not materially affect pool results. Minor adjustments allow changes applicable to 24 prior months to be incorporated into a single RA as long as cumulative changes do not exceed the following thresholds:

Minor Adjustment Thresholds (+ or -) per Line Item/Month

AS1080 Line Items	Common Line	Switched or Special Traffic Sensitive
Revenues, Uncollectibles	\$1,500	\$1,500

3.2.3

# **Spread Adjustment Reporting**

The spread adjustment option allows companies to input a series of DMAs/RAs for a specific series of months. It can be used to report the difference between actual data and what had previously been reported to the pool. The difference computed will then be spread to the number of months selected in the from/through range.

3.2.4

# Monthly Settlements Certification Requirements

Pursuant to Section 69.601 of the FCC Rules, Exchange Carriers are required to certify settlements data (AS1080) submitted to NECA. Effective June 1995, an officer or employee responsible for the preparation of monthly settlement data, and authorized to execute the certification, is required to certify the settlement data submitted to NECA. By certifying the data, the officer or employee indicates that all information submitted to NECA during a given settlement month and applicable to any settlement month, is complete, accurate, and consistent with FCC rules.

If your Data Month Estimate (DME) is a defaulted amount calculated by NECA, and no other data is reported for that given month, certification (Exhibit 3.6) would not be required. However, when these amounts are trued-up and any time data is reported to NECA, monthly certification (Exhibits 3.1 and 3.6) is required.

Exchange carriers must comply with FCC Rules, Section 69.601 as follows:

1. "Certified By" Statement on the AS1080-I Form (See Exhibit 3.1)

An officer or employee responsible for the preparation of monthly settlement data, and authorized to execute the certification, is required to certify the data submitted to NECA at the bottom of the AS1080-I form. If the data is submitted to NECA on-line through the Settlement System, the certifying officer or employee's name must be entered on the "Certified By" field. The same officer or employee certifying the AS1080-I data for a given settlement month is required to also sign Exhibit 3.6 for that month. If the data is submitted to NECA on paper (i.e., by mail, fax, or any other means), the certifying officer or employee must sign the form after the words "Certified By".

In cases where someone other than an Exchange Carrier employee submits settlement data to NECA, the name of the officer or employee authorized to execute the certification is required to appear on the "Certified By" field. A consultant or other party external to the EC cannot certify the AS1080-I data.

# Monthly Settlements Certification Requirements (Cont'd)

# 2. Monthly Settlements Certification Form (See Exhibit 3.6)

In addition, the officer or employee authorized to execute the certification, is also required to fill out and retain the Monthly Settlements Certification Form (Exhibit 3.6) at the close of each settlement cycle. The same officer or employee certifying the AS1080-I data for a given settlement month is required to also sign Exhibit 3.6 for that month. The completed original form must be submitted to your NECA Regional Office by February 1 following the calendar year being certified.

NECA and/or FCC staff may request to review this certification form (Exhibit 3.6) at any time during the year. FCC Rules state that persons making willful false statements can be punished by fine or imprisonment under the provisions of the U.S. Code, Title 18, Section 1001.

# 3.2.5

# **Notification Requirements for Mergers and Acquisitions**

Exchange carriers must notify their NECA Regional Officers of mergers, acquisitions, major asset sales and corporate name changes. In addition, they are required to provide documentation to support the change. NECA will recognize mergers, acquisitions and major asset sales on a going-forward basis and will reflect transactions within 30 days following receipt of adequate documentation.

To assure settlement continuity, companies must also indicate whether the buyer, seller or surviving corporate entity will be responsible for retroactive adjustments to settlement data for the 24-month period prior to the transaction's effective date.

Section 3	
Data Entry and Reporting Procedure	s

3.2.6

# Non-Compliance

An exchange carrier is in non-compliance with pooling procedures if adjustments to a Data Month Estimate for the following revenue and demand items are not submitted within 2 months of the DME and there is no documentation that an adjustment is not required. The items are:

- Access Lines in Service
- Carrier Common Line Premium Earned Revenues
- Traffic Sensitive Switched Access Minutes
- Traffic Sensitive Switched Access Earned Revenues
- Lifeline Connection
- End User Subscriber Line Charge (SLC) Waiver

End User SLC Waiver and Lifeline Connection Assistance will be tested for Compliance with pool procedures in the March and September settlement cycles, coinciding with the semiannual LA/PSL Data Collection.

<sup>\*</sup> Pursuant to FCC Rules, Section 69.601, Exchange Carriers are required to certify AS1080 data.

Exhibit 3.2

# **Instructions for AS1080-I Monthly Input**

#### **PURPOSE**

The AS1080-I is a source document for all entries to the NECA Settlement System. You may transmit this form via a dial-up data terminal or by mailing it to your NECA Regional Office.

# **HEADING**

# **Entered in System**

Enter month and year to which the data applies. Use this heading for DME, DMA or RA.

# Applies From/Through

Enter months and year to which the data applies. Use this for SPR.

# Data Type

Enter DME, DMA, RA or SPR depending on data type.

#### CO

Enter exchange carrier name.

# SA

Enter six digit study area code assigned by NECA.

# To enter DME Data on Lines 1 through 21

Entries on these lines should reflect total amounts for each item. See exchange carrier input guide (Sections 4 and 5) to complete.

# To enter adjustments (DMA, RA or SPR) on lines 1 through 21

Entries on these lines should reflect the difference between prior and current inputs. To compute adjustments, subtract current settlement data from revised data.

#### **Data Comments**

Use data comments to explain:

- obvious data fluctuations
- reason for retroactive and spread adjustments.

#### Prepared By

Use this field to identify the person who entered the data on the EC1050-I form.

# Certified By

Use this field to certify all settlement data submitted to NECA on the EC1070-I form. Pursuant to FCC Rules, Section 69.601, an Exchange Carrier officer or employee responsible for the preparation of monthly settlement data, and authorized to execute the certification, is required to certify the settlement data submitted to NECA.

Exhibit 3.4

# Instructions for Optional Worksheet Detail of Data Month or Retroactive Adjustments

#### **PURPOSE**

This worksheet is an optional form to help you determine and compute adjustments. It also provides supporting detail for all changes reported on the AS1080-I. You may retain this form within your company.

# **HEADING**

Month/Year

Month and year you are reporting data to the system.

Company

Name of Exchange Carrier.

Study Area

- Six digit code assigned by NECA.

#### **Revised Data**

This is the data that resides in your internal records. It is what the affected month's pooling data should have reflected.

# Latest View Settlement Data

This data can be retrieved from the NECA Settlement System. It is the latest view for the data month being adjusted.

# Adjustment

This is the difference between the revised data and the latest view settlement data.

**NOTE:** For RAs, fill in data comment by describing, in detail, the reason for the adjustment including the item being adjusted.

When reporting dollar amounts, round to the nearest whole dollar.

Exhibit 3.5

# Instructions for Optional Worksheet to Compute Spread Adjustments

#### **GENERAL COMMENTS**

Since the worksheet is an optional form to help you compute the spread adjustment amounts, please retain this with your records.

Round all dollar amounts to the nearest whole dollar. When the adjustment for the from/through period is not evenly divisible by the number of months in that period, the excess amounts will be applied to the last month in the period.

#### HEADING

Month/Year

Month and year from/through for which you are reporting adjustments into the settlement system.

Company

Name of exchange carrier.

Study Area

Six digit code assigned by NECA.

#### **Revised Data**

This is what the pooling data in the from/through period should have reflected. This data resides in your internal records.

#### Latest View Settlement Data

This is the latest view for all the data months being adjusted. You can retrieve this from the NECA Settlement System (AS1080-SL) for the same from/through period selected.

# Adjustment

This difference amount reflects the required adjustments from/through period to the latest view based upon the EC's most current financial data. This amount will be input through the spread adjustment option and then spread evenly over the selected from/thru period.

# **Control Total**

Sum of column totals for system verification of input data.

# **Data Comments Required for SPR**

Describe in detail the reason for the Spread Adjustment including the item being adjusted.

#### Prepared By

Use this field to identify the person who entered the data on the EC1050-I form.

#### Certified By

Use this field to certify all settlement data submitted to NECA on the EC1070-I form. Pursuant to FCC Rules, Section 69.601, an Exchange Carrier officer or employee responsible for the preparation of monthly settlement data, and authorized to execute the certification, is required to certify the settlement data submitted to NECA.

Pursuant to FCC Ri	ules (Section 69.60	11), Exchange Carriers	are required to certif	y monthly settlement data

This form is to be used to certify monthly settlement data (AS080-I) submitted to NECA. The completed form should be maintained monthly by the company and <u>submitted to NECA by February 1</u> following the calendar year being certified. NECA and/or FCC staff may request to review the certification form at any time during the year. (FCC Rules state that persons making willful false statements in this data submission can be punished by fine or imprisonment under the provisions of the U.S. Code, Title 18, Section 1001.)

submitted to NECA.

# **SECTION 4**

# **Common Line Pool Reporting**

This section contains line reporting instructions to help you complete the IC1090-I for the Common Line Pool. Where there is additional information for a line number, an asterisk appears next to that line number and you can find the additional information in the narrative that follows. Your NECA Regional Office can answer further questions on developing monthly settlement amounts.
